HAVING MADE AN ARRANGEMENT

With the Patentee, we are now prepared to furnish to order the above Mills, of any size, burreand boits. The Mill is slauple in its construction, having year, little machinery occupying both title aspec, and warranged to do more work with the same amout of power, and make as good a quality of flour, as any Mill now manufactured. Proprietors of Saw Mills, especially those that use steam, would find it to their advantage to purchase one of these Mills, for the purpose of doing custom grinding—either wheat, cora or other grain. The Mill will be sold without the boit. The principle of the Mill is equally applicable to the construction of large Marchani Mills, and persons about to build, would do well to call and examine.

We will also furnish with the Mills, Bolting Resis of any size and length, Smut Machiner, Wheat Cleaners, Stout Packers, etc.

Orders respectfully solicited.
